

I Wish You Could See What I See...

I wish you could see what I see...

When you help your sister read

A teacher taking care of others and making a difference, someone the world surely needs.

I wish you could see what I see...

When you run and climb that tree

An Olympic athlete competing for the gold, dreaming and hard work are the key.

Go for the GOLD!!

I wish you could see what I see...

When you comfort your friend in need

A future first responder, a counselor, a doctor, helping others and taking the lead.

I wish you could see what I see...

When you help me water the lawn

A fire fighter dedicated to helping others from dusk to dawn.

I wish you could see what I see...

When you help me cook our meals

A world-renowned chef- WOW! How great does that feel?!

I wish you could see what I see...

When you are completing your homework at night.

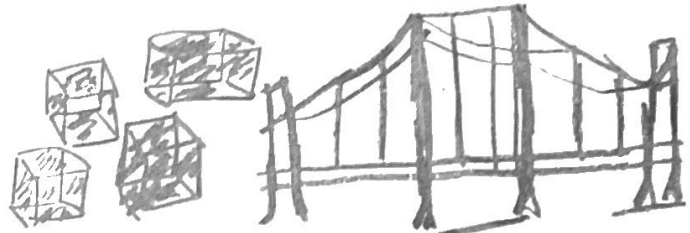

I see you discovering cures to diseases that once we could not fight.

I wish you could see what I see...

When you are playing and building towers.

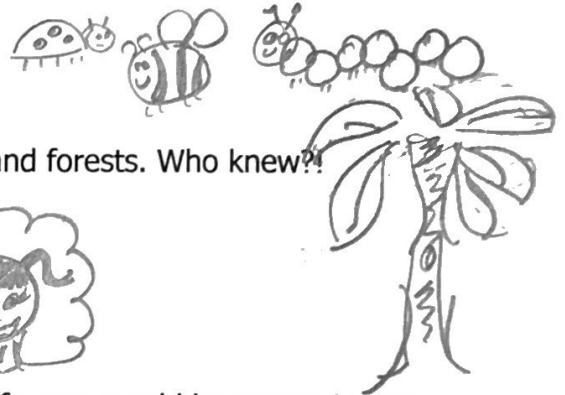

An architect designing a new world. Building bridges, imagining, and creating for hours!

I wish you could see what I see...

When you are collecting bugs and roaming the zoo.

An animal expert that explores the world's jungles and forests. Who knew?!

I wish you could see what I see...

When I watch you every day.

The dreams, the possibilities, the potential in your life, you would be amazed in so many ways!

If you are not sure what goggles or glasses I wear when I see you work and learn-

It's simple- God gave me special lenses of love, for me to look at you and discern...

All the plans He has for your life. It would take your breath away.

Stay close to God and He will reveal a little of His plan each day.

Wow! It is so exciting to see what you can do.

Develop your gifts and talents and nothing will be able to stop you.

Becoming all that God has planned- it really is exciting.

The world is waiting to see your life's story that He is writing.

The End

{your story}

Encouraging others...one moment at a time.
